ACADEMIC PROJECTS UNDERTAKEN

Laptop World

Language : PHP (Laravel Framework), Database : MySql

Laptop world is an ecommerce website, specifically for laptops and their accessories, designed on the basis of problems that users face everyday and to give them a safe and secure environment while browsing.

PROJECTS

Car Rental Marketplace

The primary objective of the project is to ensure proper management for all roles, including Admin, Vendor, and User. For this, I utilized the Laravel framework along with HTML, CSS, Livewire, and Bootstrap for the design aspects. I implemented Laravel's built-in authentication system and mail functionality for necessary communications, and I also added PDF generation capabilities.

Module:- Commission , Vendor, Manage Car

Influencer Panel

This is a panel for an influencer who manages uploaded reviews for a bike marketplace platform. For this, I used the Laravel framework along with HTML, CSS, and Bootstrap for the design aspects

Module: Account , Login & Register, Manage Reviews

Custom WordPress Plugin

Created a custom WordPress plugin for a bike marketplace to display videos from YouTube related to bike marketing, and worked with different themes for various WordPress projects

DOT (Insurance policy)

I worked on an insurance policy project where I created an Excel file for exporting data and enhanced the code to handle large data exports. I also developed a report scheduler to send monthly, yearly, weekly, and daily reports via email with attachments. Additionally, I worked with AWS S3 buckets to manage and store files.

IT Training classes

Worked on an ERP project where I implemented notifications for inquiries and call reminders. I also developed features for login and registration, displayed student fees data, and created student batches.
